*Go For Safety* helps kids learn firesafe behavior through activities based on lessons presented in the illustrated book, audio CD and interactive DVD. It's designed to capture the imaginations of kids 7-9 years old, and to make their learning experience interactive and engaging.

### ***How The Components Work Together...***

1. **The Audio CD**— This 16-minute audio CD introduces children to each of the five fire safety theme songs while telling the lively story of two gopher families competing on a game show presented by the “Tunnelvision Network.” This audio CD is designed to be used effectively with the DVD, or used independently if you wish. It is a good tool to help you introduce children to the topic(s) you’ve selected for your fire safety lesson.

2. **The Illustrated Book** — Children enjoy reading this book while they listen to the story on the audio CD. The combination helps bring the characters to life and visually reinforces the the story’s fire safety lessons. School administrators also recognize the book’s value in helping kids develop reading skills as they follow along with the CD.

*Additional copies* of the illustrated *Go For Safety* book may be ordered directly from The Idea Bank. See the back cover of the book for more information.

3. **The Printed Teaching Materials**— Reproducible lesson plans, sheet music and coloring activities are all organized according to the five program topics. This will assist you in preparing a classroom lesson with handout materials that match the topic(s) you’ve selected from the audio CD, book and DVD.

4. **The *Go For Safety* DVD**— is laid out in a way that enables you to quickly navigate through its five segments to focus on points related to your lesson topic(s). The interactive nature of the DVD encourages group participation, so you’ll want to anticipate that. For consistency, each of the five topics on the DVD matches those on the audio CD and the printed teaching materials...
